

## Anti-Mice Wall Plug Device

### GENERAL INFORMATION

Electronic ultrasonic mouse repellent device. This device, through modulated emission of ultrasonic frequencies (modulation prevents getting used to ultrasonic disturbance), is able to discourage mice from entering the environment in which it is installed. At the same time it causes the departure of those already present. Totally non-toxic, odorless and free of any chemical product, it represents the ideal solution for freeing the environment from unwanted animals in a completely ecological way.

**PLEASE NOTE:** The ultrasonic frequencies emitted are beyond audibility of humans and pets so there is no type of disturbance during use. For perfect and effective use, once the product has been inserted into the mains socket, it must always be left running.

### HOW TO USE

Plug the device into a normal power outlet making sure there are no obstacles in front. A soft green light will indicate that it is turned on. During operation, two rapid flashes will confirm correct ultrasonic emission.

### TECHNICAL DATA

- The device is tested at the **University of Camerino** which declares its effectiveness;
- **CE** tests for electrical safety and electromagnetic compatibility at TÜV laboratories;
- **ROHS** certification;
- **Power supply:** 230 V / 50 Hz
- **Consumption:** 1,6 W
- **Weight:** 60 g
- **Dimensions:** 50x80x50 mm
- **Coverage volume:** ~ 80 m<sup>3</sup>

**IMPORTANT:** This device is not intended for use by children or people with reduced physical, sensory and mental capabilities unless they are supervised by an adult responsible for their safety.
