

Anti-Mosquito Bracelet

GENERAL INFORMATION

Battery-powered electronic anti-mosquito device with the use of audible and inaudible variable frequencies.

Once activated, it emits an ever-changing series of low-frequency sounds specially calibrated to annoy mosquitoes and keep them away. Female mosquitoes are the only ones that bite once they have been fertilized and at this stage they repel the male. The light sounds emitted by the device reproduce the frequencies of the male mosquito in search of females, forcing them to move away.

Everything happens in a totally ecological and natural way without the use of harmful and polluting chemicals.

HOW TO USE

- Press the button in the center of the dial for one second, when released **5 flashes** indicate that the product is operating at the minimum sound level;
- By pressing a second time, **2 flashes** indicate that the product has switched to maximum sound level;
- By pressing a third time, **5 rapid flashes** indicate that the product is operating at an inaudible high frequency;
- By pressing a fourth time, **1 flash** indicates the return to the minimum sound value;
- By holding the button down for one second, **1 long flash** indicates switching off.

PLEASE NOTE: When the product is turned on, every 15 seconds 2 rapid flashes indicate correct operation.

TECHNICAL DATA

- The device is tested by university bodies which declare its effectiveness;
- **CE** tests for electrical safety and electromagnetic compatibility at TÜV laboratories;
- **ROHS** certification;
- **Action radius:** 2,5 m (3,3 ft)
- **Weight:** 21 g (0,7 oz)
- **Dimensions:** 42x34x11 mm (1,6x1,3x0,4 inches)
- **Coverage Volume:** ~ 40 m³ (1135 bu)
- **Battery:** 3V CR2032
- **Battery life:** ~ 3 months for 6 hours a day
- **2 years** warranty.

To replace the battery, unscrew the four screws on the back of the device: once opened, remove the used battery and replace with a new one.
